PROFILE

Full-Stack Developer and AI/LLM Engineer who builds production-grade, end-to-end applications with React, Node.js, and Python. Hands-on experience shipping LLM-powered systems – RAG pipelines, autonomous AI agents, and a live, payment-integrated client platform – that pair clean UX with real automation and turn complex requirements into intelligent, user-centric products.

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6+), SQL
Frontend	React, Tailwind CSS, HTML5, CSS3, Responsive UI/UX
Backend	Node.js, Django, REST APIs, Razorpay Payments
AI / LLM	RAG, Multimodal RAG, AI Agents, NLP, Prompt Engineering, OpenRouter API, Vector Search
Cloud & Tools	AWS S3, Git, GitHub, Vercel, VS Code

PROJECTS

Be Your Own Coach (BYOC) – Paid Coaching Platform LIVE CLIENT 2025 – 2026

React · Node.js · Razorpay · AWS S3 • [beyourowncoach.in](#)

- Designed and shipped a production fitness-coaching platform for a live paying client, now serving real users in production.
- Integrated the Razorpay payment gateway with secure pay-to-unlock access – premium videos stream from AWS S3 only after verified payment.
- Built access control that gates premium content to paying users, protecting client revenue and proprietary course material.

AI Desktop Assistant – Agentic System Automation 2026

Python · LLM Agents · Tool-Calling · Memory Layer

- Built a desktop AI agent that controls the local machine through natural language – creating and reading files/folders, summarizing documents, fetching news, launching localhost projects, opening sites, running web searches, and scheduling calendar events.
- Engineered a persistent memory layer that stores summarized past conversations, giving the agent context-aware recall across sessions.
- Architected an intent-to-action tool-calling workflow that maps user requests to safe system operations.

Resume RAG – AI Resume Q&A Assistant 2026

React · OpenRouter API · Retrieval-Augmented Generation

- Built a RAG application that lets recruiters ask natural-language questions about my resume and receive instant, source-grounded answers.
- Engineered a retrieval pipeline over resume content with LLM responses via OpenRouter, preventing off-context and hallucinated replies.
- Delivered a responsive React chat interface for real-time, conversational Q&A.

AI Learning Hub – 27-Module Interactive Platform IN PROGRESS 2026 – Present

React · RAG · OpenRouter API · Animated UI/UX

- Building an animated learning platform of 27 modules spanning AI, RAG, AI Agents, and Multimodal RAG, organized into 6 core branches.
- Designing a branch-wise RAG architecture – 6 dedicated knowledge bases – so users can chat with and query each topic through integrated LLMs.
- Crafting an engaging, animated UI/UX for an interactive, explore-as-you-learn experience.

EDUCATION

B.Tech, Computer Science & Engineering – Narasimha Reddy Engineering College (JNTU-H) · 68%	2022 – 2026 · Hyderabad
Intermediate (MPC) – Alphorse Junior College · 88.2%	2020 – 2022 · Karimnagar
Secondary School (SSC) – Ratnam Global High School · 10.0 CGPA	2019 – 2020 · Karimnagar

CERTIFICATIONS

- Certified Professional Prompt Engineer in AI
- AI Mastermind
- Introduction to HTML & CSS
- Data Visualization: Business Insights
- Java Programming for Beginners
